A vacuum for every need

FEIN Dust Extractors

FEIN dust extractors are powerful and durable, yet comfortably quiet. Vacuum performance is measured by static water lift. At 90 to 99 inches of water lift, FEIN dust extractors produce far greater suction than the competition. And, at an average 60 decibels, they are far quieter than most other popular vacuums.

All FEIN dust extractors are designed for heavy-duty, continuous industrial

use and employ dual fan turbo cooling to extend motor life (see inset copy below). All models can be used wet or dry and have accessory filters available that capture particles down to .3 micron (HEPA).

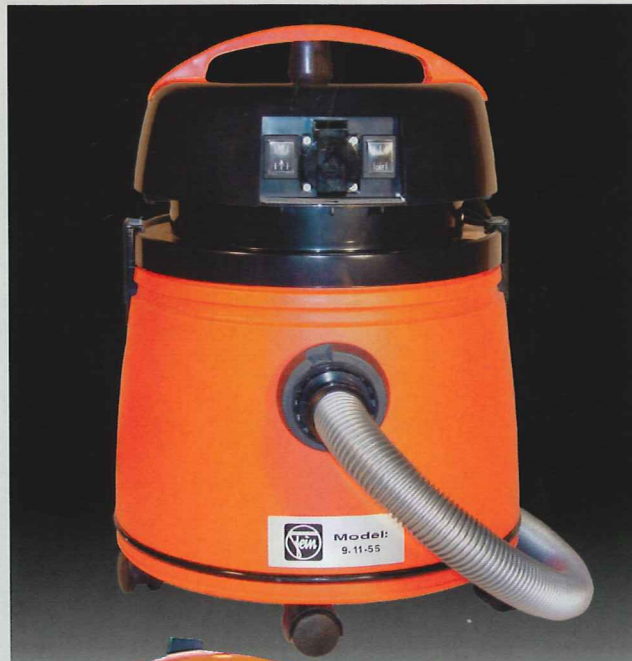

Dust-Free Sanding

The FEIN dust extractors, when combined with FEIN's random orbit sanders, are an integral part of FEIN's 98% dust-free sanding system.

Plug your random orbit sander directly into a FEIN dust extractor. The tool's switch turns the dust extractor on and off and provides a ten second delay after shut-off to clear the hose. FEIN dust extractors handle power tools with inputs of 40 to 2000 watts (.3 to 19 amps).

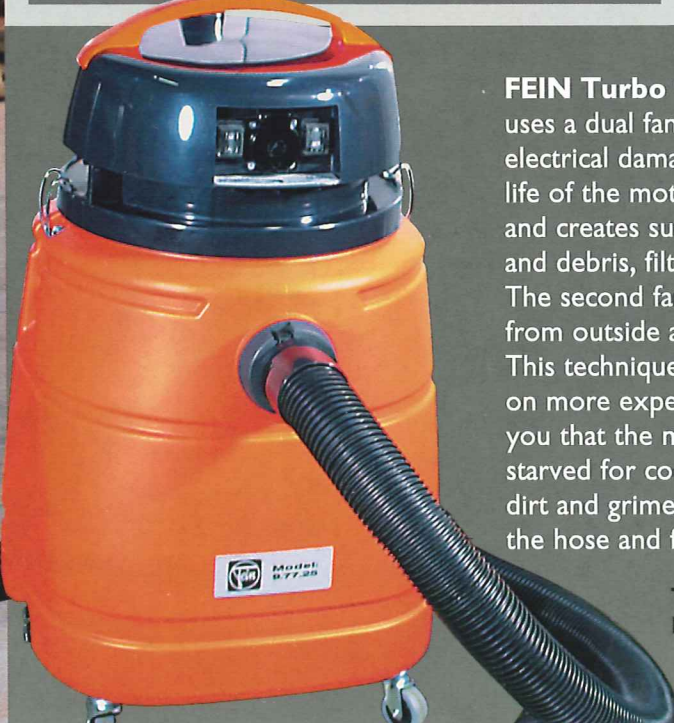

TURBO II Dust Extractor
Part No. 9-55-13

Power Beater Brush
Part No. PB 350

TURBO I Dust Extractor
Part No. 9-11-55

FEIN Turbo Cooling Technology uses a dual fan motor to prevent electrical damage and extend the life of the motor. One fan is sealed and creates suction to draw in air and debris, filter it and exhaust it. The second fan draws cooling air from outside and across the motor. This technique, typically found only on more expensive vacuums, assures you that the motor will never be starved for cooling air or exposed to dirt and grime from the tank, even if the hose and filter are blocked.

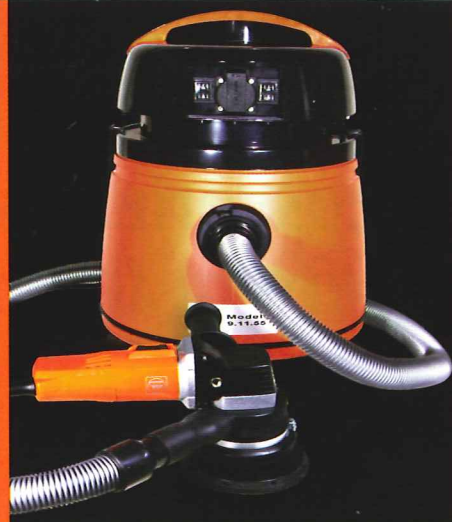

TURBO III Dust Extractor
Part No. 9-77-25

A vacuum for every need

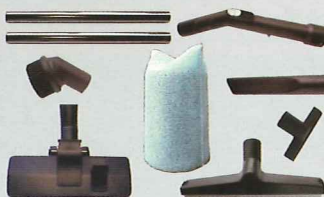

TURBO I is quiet, powerful and portable. Whether you use it as a shop vac or as part of a dust-free sanding system, the TURBO I is perfect for the shop as well as the house. Part No. 9-11-55

TURBO II is our most popular model, the original workhorse of the line. It features more power and greater capacity. Part No. 9-55-13.

TURBO III has a hefty 14½ gallon capacity and even more power for the big jobs. It comes with a 2¼ inch hose and doubles as a clean and efficient workshop dust collector. Part No. 9-77-25.
